DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-15, drawn to a plant/dry gift assembly, classified in class 47, subclass 66.6.
- II. Claims 16-18, drawn to a method of assembly, classified in class 47, subclass 58.1R.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to place cake batter (a wet assembly) in the oven (a dry chamber).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
